Some of my work...

Hack Kosice - poster

This poster was designed using Hack Kosice's brand colors to capture the attention of potential participants. Its goal was to clearly communicate the organization of a hackathon and provide key information about the date and location of the event.

Some of my work...

RT-Počasíčko

This design was created as part of term paper for a friend. The main features of the application include:

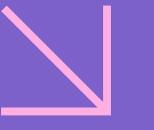

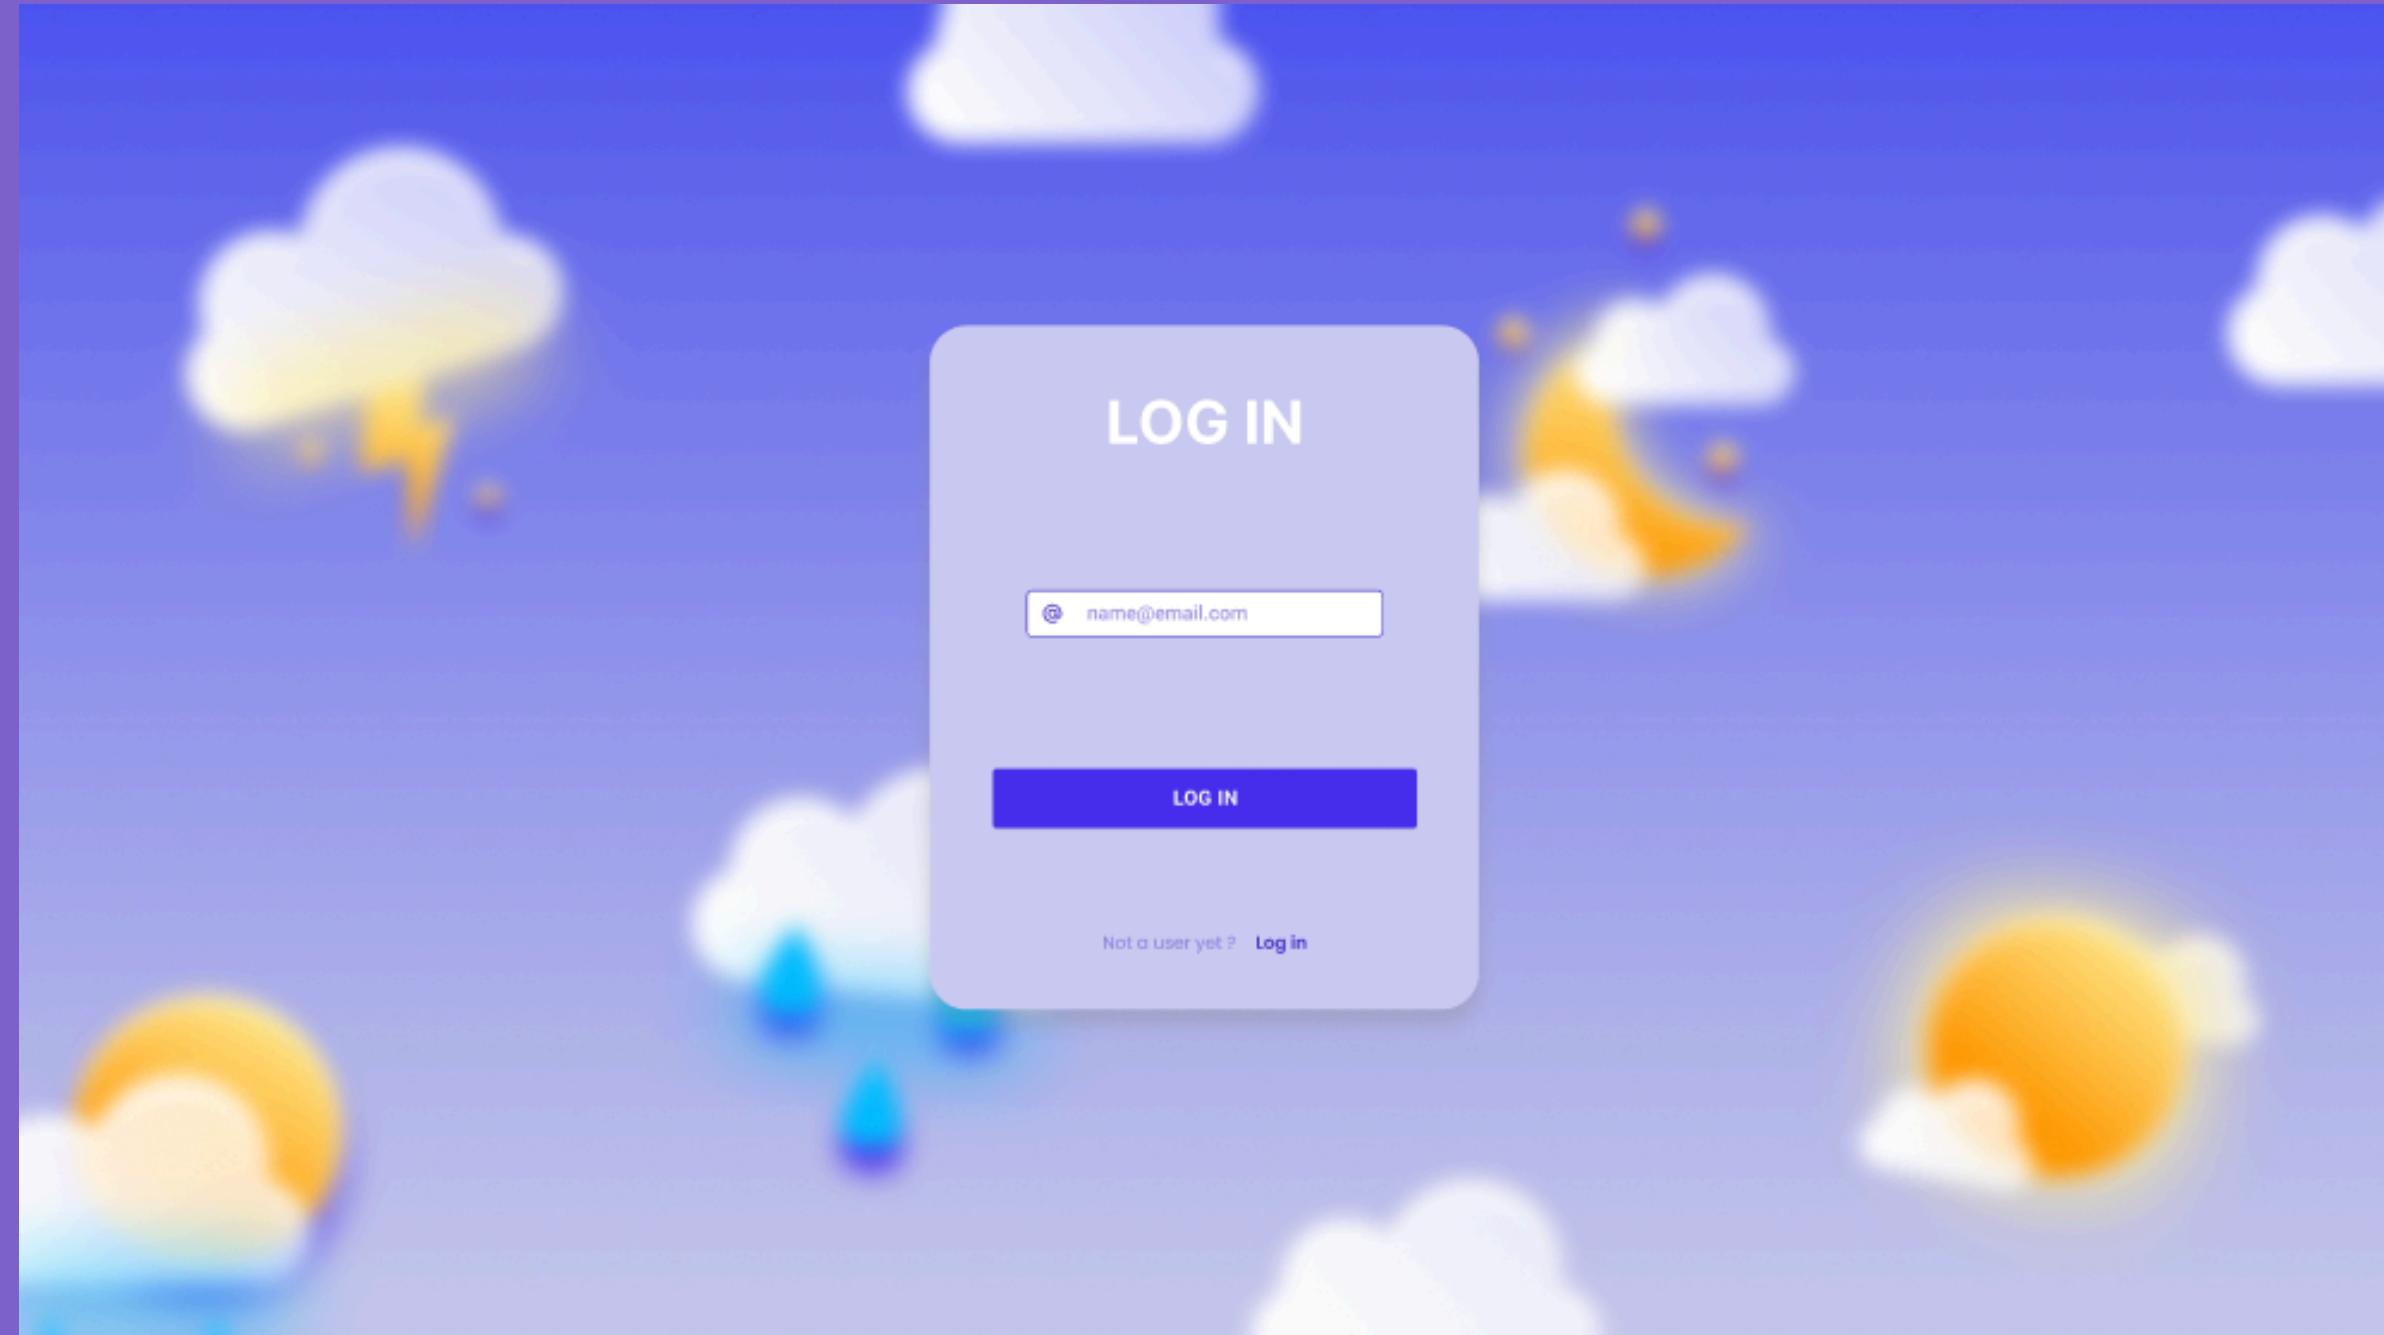

- user login,
- display of current location and city,
- the ability to manage favourites and recently searched locations,
- setting to change the temperature unit.

I focused on clarity, intuitive controls and aesthetics to ensure the app meets the requirements of both users and tasks.

CB360

Web design for corporate presentation:

I created this design with an emphasis on clarity and functionality, with the main goals being:

- introduction of the company and its activities,
- showcasing references and portfolio,
- clear display of prices for services,
- a simple and effective contact form.

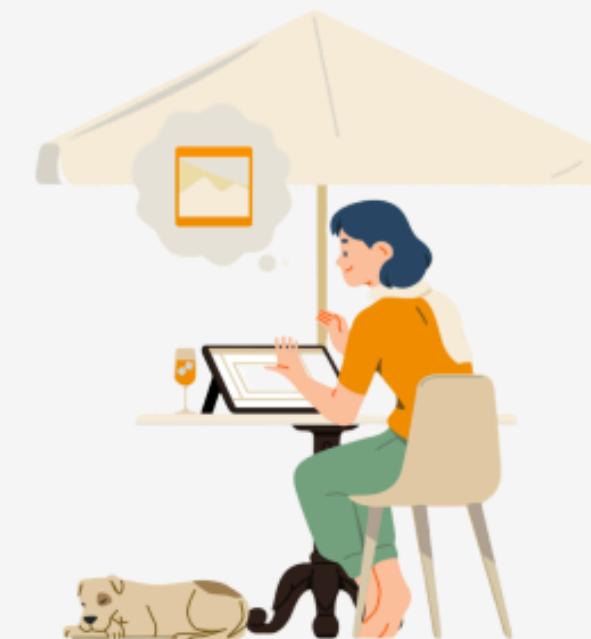

The design combines modern elements and intuitive navigation to provide customers with a pleasant user experience and promote their trust in the company.

Virtuální prohlídky

Díky virtuální prohlídce si mohou svou návštěvu naplánovat a vidět jak to u vás vypadá ještě než k vám výrazí.

[Prezrite si naše portfólio](#)

Co umíme ?

Získejte další zákazníky pro svou kavárnu, restauraci nebo hotel. Díky tomu můžete oslovit i větší skupiny zákazníků jako firemní akce, svatby nebo oslavy narozenin.

Samozřejmostí u nás je publikace virtuální prohlídky do Google Maps a Mapy.cz.

Virtuální prohlídky Matterport vám umožní zájemcům projít si každý kout nemovitosti. Ponoří se do prostoru, rozhlížejí se kolem sebe a objevují každou místnost a detail bez fyzické přítomnosti.

Matterport prohlídky poskytují realistický a přesný pohled, a zvyšují počet vážných zájemců o nemovitost na prohlídkách.

Some of my work...

HelpEE

This design was created as part of a hackathon brief to promote mental health and education.

The main elements of the site include:

- CTA to live chat for quick connection with a professional (psychologist or psychology student),
- An introduction to the project and its mission,
- a link to the training offer,
- a section of interesting "fun facts",
- a practical guide to mental health support.

The web is designed to be accessible, modern and attractive, combining educational elements with the possibility of immediate help. **This work was also awarded the audience prize at the hackathon.**

Some of my work...

<https://bluelemons.sk/work/way2eco>

Way2Eco

This design was created during the Digital League course organized by Blue Lemons in Košice. The application was designed to track and analyse an individual's carbon footprint based on the use of different means of transport.

The main features of the app (or parts of menu) are:

- **Home page:** It displays a large pie chart that visualizes the user's mobility by individual means of transport.
- **Activity:** History, where the user can see their past trips and the means of transport they have used.
- **Score:** Gamification element of the app. Users are ranked in a leaderboard according to their carbon footprint, motivating them to reduce it.
- **Graph:** Detailed carbon footprint statistics by day and month, with the option to filter by means of transport.
- **Profile:** A section for editing application settings and user personal data.

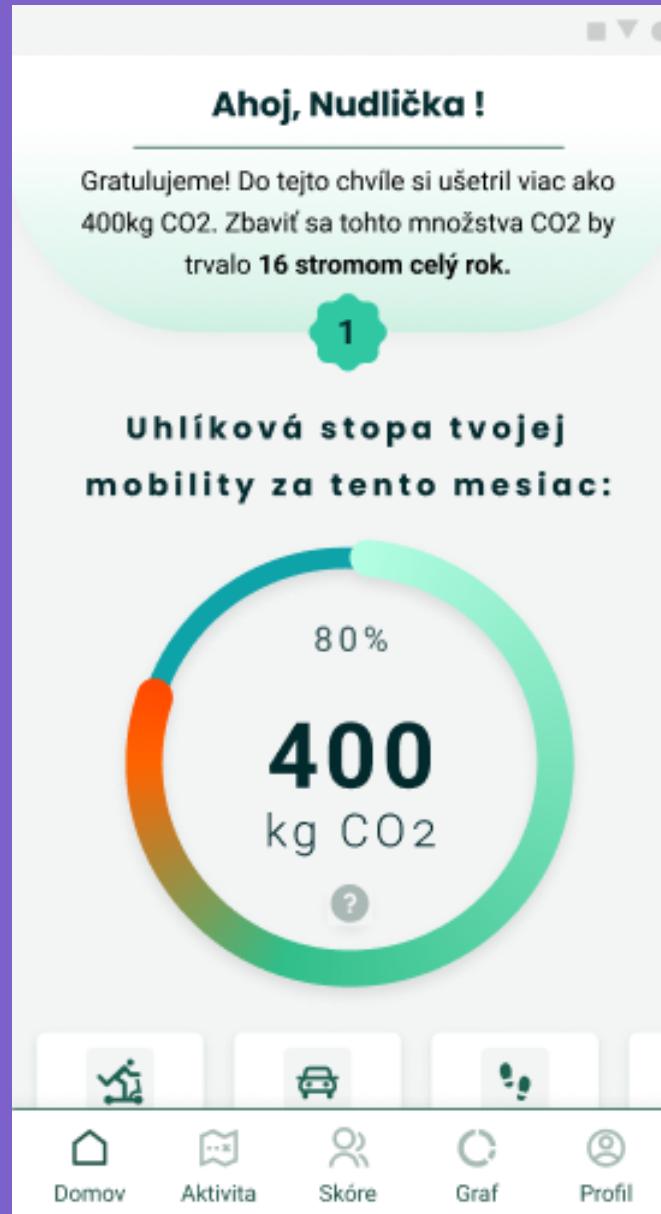

This project focused on combining sustainability and user engagement through a clear design and gamification.

The application made it to the TOP 10 and received a special partners' award in the 3rd edition of the Innovation Marathon "Nakopni Prahu."
